This section is administered to respondents who reported a pregnancy in Section 16. Pregnancy questions are asked for all relationships listed in Section 16 that show a pregnancy. The response to H4TR18 (total number of pregnancies reported with a particular partner) determines the number of pregnancy records generated for each relationship. Thus, for each partner, {fill H4TR18} pregnancy observations are generated to indicate the 1st to the {fill H4TR18} pregnancy with that partner. The pregnancy number is saved in constructed variable PRGNO.
